

ORGANOCID

LIVESTOCK DRINKING WATER ACIDIFIER

Organocid can be used for broilers, breeders and layers as an acidifier for drinking water and is a highly concentrated liquid organic acidifier. It is a solution for problems involving abnormal bacterial flora arising from the incorrect pH of the gastrointestinal tract.

Organocid is specially formulated with a selected composition of specialised concentrated acids which are highly bacteriostatic and bactericidal, and inhibit the development of colibacillosis, coccidiosis, salmonellosis, and gas gangrene.

Some selected Acids in this formula will stimulate liver, kidney, and pancreas function. When used regularly and livestock can benefit from a toning, a spasmodic, and analgesic effects.

BENEFITS

- Lowers mortality.
- Lowers the pH of the gastrointestinal tract.
- Limits the proliferation of pathogenic bacteria through the acidification of the gastrointestinal tract with reduction of Enterobacteria such as E. coli and Salmonella.
- Better ADG (Average Daily Gain).
- Better eggshell quality.
- Better FCR (Feed Conversion Rate).
- Maintains a healthy balance of bacterial flora.

COMPOSITION

Organocid Contains the following acids:

- Lactic Acid
- Formic Acid
- Citric Acid
- Phosphoric Acid

USAGE INSTRUCTIONS

For Livestock add 500 ml per 1000 Lt of Drinking water. Depending on the pH level of your existing water supply, adjust the dose to achieve pH of drinking water ideally to around 4-5.

Organocid can be used for all species and production groups of live- stock at any time during production.

It is recommended Organocid be utilised for the first 16 days of the bird's life and during the last 72 hours before processing, to help during times of stress and reduce bacteria loads.

Organocid is also recommend for use the day before, the day of and the day after each feed change (at any time the feed is changed) to prevent upsetting the gut flora and any feed passage issues. Organocid will prevent the disruption of the intestinal flora.

Organocid does not require a withdrawal period
Do not mix Organocid with other products.
