

IODOPHORE 2.8

IODINE BASED VIRUCIDAL DISINFECTANT FOR INFECTIOUS DISEASE CONTROL.

APPLICATION/USAGES

- Livestock housing & farm buildings.
- Drinking water disinfection.
- All food processing & preparation industries.
- Dairies & milking equipment.

- Powerful Virucidal action.
- Rapid, unparalleled effectiveness against mixed infections.
- No known resistant pathogens.
- Bactericidal against both gram-positive & gram-negative bacteria.
- Good detergent action.
- Retains activity in the presence of organic soiling & hard water.
- Non-corrosive & non-staining formulation with low user toxicity.
- Food Safe.
- Contains a powerful detergent allowing cleaning and disinfecting in one operation.

CONFORMS TO BRITISH AND EUROPEAN STANDARDS

BS EN 1276	Bactericidal Food Industry Disinfection.
EN 1656:2000	Bactericidal Veterinary Disinfectants.
EN 1657:2000	Fungicidal (Yeasts and Moulds) activity.
EN 14204:2004 (E)	Mycobactericidal activity.
PREN 13704:2001 (E)	Clostridial activity.

APPLICATION	USE DILUTION
General Purpose Disinfection.	1:500
Floors, Porus & Heavily Soiled Surfaces.	1:250
Equipment, Tanks, Cages, Feeders.	1:500
Foot and Wheel Dips.	1:100
Misting (Aerial Applications).	1:300
Water System Disinfection.	1:250
Drinking Water Sanitisation.	1:2500-1:3000
