VetoSacc[®]

Gut Health Revival and Immunity Booster Formula

VetoSacc supports the health and productivity of poultry in all stages of development and all types of production – from hatchery to harvest. The probiotic actions of VetoSacc result in stable digestive function and better immune responsiveness.

This helps to reduce enteric challenges in poultry which impacts growth and productivity, so producers see better growth rates, improved feed efficiency, reduced mortality, and achieve a positive economic return.

Composition:

VetoSacc contains carefully selected multi strain live microbes in a definite proportion containing *Saccharomyces cerevisiae*, *Saccharomyces boulardii*, *Lactobacillus acidophilus* and prebiotic fructo-oligosaccharides (FOS).

Each gram of VetoSacc contains more than 2×10^9 CFU's.

Directions of Use:

Prepare a stock solution for 1000 birds by slowly dissolving VetoSacc in 500 ml of water by constant stirring. Add this stock solution into drinking water of 1000 birds.

Routine Application:

100g/1000 birds/day

Application at Specific Stress Periods:

200g/1000 birds/day

- ✓ Post Antibiotic Treatment -For 4 consecutive days starting 24 hours after antibiotic application.
- ✓ Around Feed Changes - For 3 consecutive days starting one day prior to feed change.
- ✓ During Stress Period- Recommended daily.

In Feed: 300 to 500g/ton of feed

Presentation: 500 gm, 1 Kg & 5 Kg
